Twitter

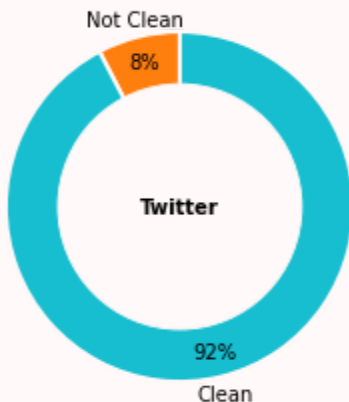

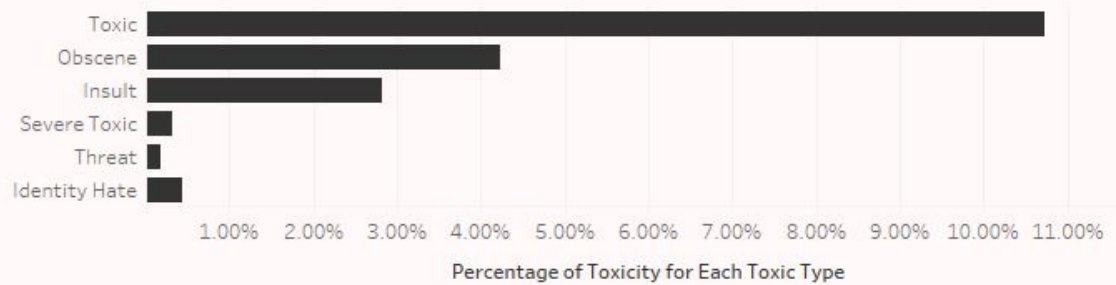

Platform With  
Most Obscene Toxicity

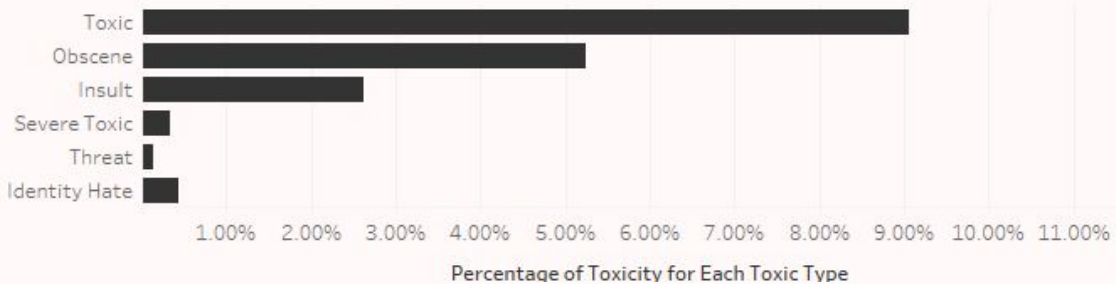

### League of Legends on Discord

### League of Legends on Twitch

### League of Legends on Twitter

### Interpretations

- On all three platforms, two common subtypes of toxicity in the gaming environment are "obscene" and "insult", which include words about sexual organs and violence.
- All three platforms generally have similar distribution of toxicity types.
- "Severe toxic" and "threat" comments usually include words about death and severe crime.
